

PARK TERRACE
A T G R E E N W A Y
a senior living community

Dear Residents, Family Members and Friends of Park Terrace

8/4/21

With Covid cases on the rise again in Arizona due to the Delta variant, I thought it would be a good time to remind everyone about our current protocols.

For residents, if you have been fully vaccinated, you are not required to wear a mask while on Park Terrace property. Of course, you are free to wear one if you choose. If you are going off property to a crowded indoor area, like shopping at Walmart, we strongly encourage you to wear a mask in those situations, but again, it is your choice. We always have a supply of masks available at the front desk and on the bus.

For your visitors, if they have been fully vaccinated, they are welcome in all of our common areas and it is up to them if they want to wear a mask. However, for those visitors who are not fully vaccinated (and this includes children) they are not allowed in our common areas (lobby, pool, etc.) and may only go directly to and from your apartment for a visit. We also ask that those unvaccinated visitors wear a mask while they are going to and from their vehicle to your apartment.

The Delta variant has proven to be more contagious than other strains of the Covid virus. The good news is that the vaccines are very effective against all current variants of the Covid virus, including the Delta variant. However, no vaccine is ever 100% effective. So please consider wearing a mask when you are around others.
